Hello Mrs. Brinkerhoff,

At your request, I have attached a copy of the permit application provided by Alton Coal Resources, LLC on 8/27/2009. This is a zipped folder. The operation and reclamation plan is in Chapter 5. The hydrology information is in Chapter 7 and appendices. The Division is currently reviewing this information. In the event that you can not open this zipped folder, you can view these and other files related to the Coal Hollow permit application at the following web site address:

<http://www.ogm.utah.gov/mining/default.htm>

Scroll down to the bottom of the page and click on Access To Electronic Version of Coal Files.

In the coal files scroll down and click on Coal Hollow Mine C/025/0005.

The files will come up. They are not in chronological order. When you click on a file, you will be asked to enter a login and password. Use ogmguest as both the login and password.

For the most recent permit application information, scroll down until you see the August 27, 2009 date with the subject "MRP Chapter 7 & 8," and keep scrolling to find a separate file "Mining and Reclamation Plan Chapters 1 - 6," also received on 8/27/2009.

I realize this is very difficult to negotiate. Please call me if you need assistance.

In response to your question about the adjacent federal leases, I have attached a map that shows the Bureau of Land Management's proposed federal coal lease boundary as it was displayed during the public scoping meetings. The federal leases would extend the private coal parcel to the south, west and north. The Alton federal lease information is found on the BLM's website:

[http://www.blm.gov/ut/st/en/prog/energy/coal/alton\\_coal\\_project.html](http://www.blm.gov/ut/st/en/prog/energy/coal/alton_coal_project.html)

The Alton coal tract federal lease Environmental Impact Statement will be out for public comment in the near future. You can keep checking the blm web page or contact Keith Rigtrup, BLM Natural Resource Planning Specialist at the Cedar City Office: 435-865-3063 for further information. His email is [Keith\\_Rigtrup@blm.gov](mailto:Keith_Rigtrup@blm.gov)

# Alton Coal Tract Lease By Application

## ENVIRONMENTAL • IMPACT • STATEMENT

### Proposed Action

The proposed action is for BLM to offer the Alton Coal Lease Tract for competitive leasing in response to Alton Coal Development, LLC's application for leasing under the Lease by Application process set forth at 43 CFR 3425. The Tract would be offered for competitive lease with BLM's standard terms and conditions contained in lease form 3400-12 and special coal lease stipulations consistent with BLM policies and the Zion MEP (1981). The Alton Coal Lease Tract has been delineated by BLM and encompasses approximately 3,600 acres of federal coal reserves. The tract is proposed for development by surface mining methods to assure maximum economic recovery of the resource.
